

The Pursuit of Excellence

SATEJ PLUS™

Automated air borne disinfection device for surfaces and environment.

Enables process of disinfection which enhances standard bio cleaning process.

www.radiantinnovations.in

- Generates **dry disinfection vapour of hydrogen peroxide**-based disinfectant formulations
- Gas like diffusion and uniform exposure.
- Treatment volume of space up to 500m³/17500 cuft.
- Ultra low Disinfectant solution consumption: **200ml/1000cuft - 7ml/m³**
- Digitally controlled dispensing & disinfection process.
- Microbiologically validated process protocols Effective destruction of pathogens & multi resistant microorganisms.
- Accurate reproducibility of disinfection results at all time.
- Uses medical grade clean air.
- Complies to aseptic area & sterile area norms for airborne disinfection process as well as device.
- Absolutely safe for use in medical environment in presence of OT equipments.

DIGITAL USER INTERFACE FOR AUTOMATED PROCESS

- Enter room size & set the volume of room under the treatment.
- Pour required solution advised by the machine.
- Delayed start to leave the premises & Auto OFF operations.

Can Save upto 10 different room sizes.

MATERIALS & DESIGN FEATURES

- All stainless steel unit with easy mobility.
- Easy to refill or replace disinfectant container.
- All key components in SS316: Nozzle assembly, liquid line parts.
- Liquid and air line tubing: Medical grade.

- Reliable and robust machines.
- All Electro-Mechanical and electronic components designed to last long.
- Power supply: 8amps, 230Vac.
- Dimensions:490mm L X 440mm W X 780mm H
- Empty weight: 42kg

*specifications are subject to change.

Applications:

- Hospitals: Operation Theaters, ICUs
- Pharmaceutical Plants: Sterile areas
- Laboratories: Microbiology, Tissue Culture
- Food Processing, Animal Houses, Hatcheries
- Disinfection Treatment against Disease Epidemic
